DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants' use of a mass additive should state where or what such mass additive is in relationship to the photoconductor.

Double Patenting

3. Claims 1-19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6689522.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the same developer composition is used in a similar image forming method and it would have been obvious to one of ordinary skill in the art to use a weighted cylindrical electrophotographic photoconductor.

Claims 1-19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6902856.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the same developer would have been obvious to one of ordinary skill in the art to use a photoreceptor with cylindrical electrophotographic photoconductor.

Art Unit: 1756

4. Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 12 of copending Application No. 10/802452. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim a photoconductor including an insert in the cylindrical drum.
